

1

VENDOR AGNOSTIC

2

NO SUBSCRIPTION FEES OR VOLUME REQUIREMENTS

3

FAST CLINICAL INTEGRATION

AI-ENHANCED HUMAN INTELLIGENCE

With access to 300+ ARRT® expert radiologic technologists,* your team can be rest-assured they will receive accurate and timely images.

RISK-FREE ACCESS

Tap into 65 AI partnerships on a per-click model with no case volume requirements.

ALL-IN-ONE SOLUTION

Eliminates the need for ongoing maintenance and support.

Neuro

Cardiac

Body

Partner	Clinical Application
	Diagnosis: MS, Dementia, Epilepsy, Traumatic Brain Injury Analysis: Brain volumes; volumes over time Sample Output:
	Diagnosis: Intracranial hemorrhage, large vessel occlusion, pulmonary embolism, aortic dissection Analysis: Detect and prioritize pathologies from CT scans Sample Output: https://3drlabs.com/combinostics/
	Diagnosis: Acute ischemic stroke Analysis: Identifies ischemic core and hypo-perfused areas for assessing salvageable brain tissue Sample Output: https://3drlabs.com/cercare/
	Diagnosis: Neuro/Stroke Analysis: Detects and measures LVO and hyperdense volumes, allows for graphical visualization of CTA acquisition timing, estimate core and penumbra volumes, including mismatch ratio Sample Output: https://3drlabs.com/brainomix/
	Diagnosis: Carotid Artery Disease Analysis: Measures and monitors plaque composition for stroke risk assessment Sample Output: https://3drlabs.com/elucid-carotid/
	Diagnosis: Coronary Artery Disease Analysis: Quantifies coronary artery calcifications and measures the risk of CAD Sample Output: https://3drlabs.com/coreline/
	Diagnosis: Coronary Artery Disease Analysis: Objectively and non-invasively quantifies vessel structure and plaque composition Sample Output: https://3drlabs.com/elucid-coronary/
	Diagnosis: Sickle Cell Anemia Analysis: Measurement of liver iron concentrations Sample Output: https://3drlabs.com/resonance-health/
	Diagnosis: Incidental calcium score, low bone density Analysis: Identifies patients with asymptomatic or undetected chronic cardiac, liver, bone conditions Sample Output: https://3drlabs.com/nanox/
	Diagnosis: Bone Mineral Density Analysis: Identifies osteoporosis and osteopenia without additional radiation Sample Output: https://3drlabs.com/heartlung-ai/
	Diagnosis: Lung disease Analysis: Suppresses lung vessels and machine noise to detect lung disease Sample Output: https://3drlabs.com/riverain/
